Subject: Reciprocal Compensation

BitWise is seeing more than 100,000 minutes per month of wire-line local traffic originated by Gallatin in addition to a traffic exchange in excess of a 60/40 ratio in excess of three months. Per our ICA we are requesting to apply the "Usage Rate" stated below. Since the CDR records are too large for email I have not included them. If needed we can provide verifiable traffic information as stated below via FTP or CD-ROM.

5. Reciprocal Compensation: The Parties reserve the right to apply the Reciprocal Compensation Transport and Termination Usage Rate ("Usage Rate") of \$0.015 per Minute of Use in the event that A) a Party terminates 100,000 or more minutes per month of wire-line local traffic originated by the other Party for a period of three (3) consecutive months, and B) the representative proportion of total wire-line local traffic exchanged between the Parties exceeds 60/40 ratio. When such threshold is met, either Party may provide the other Party a written request, along with verifiable traffic information supporting such request, to establish the application of the Usage Rate. Notwithstanding the language above, neither party shall compensate each other for Internet Bound traffic, and /or Internet Service Provider (ISP) traffic, except as otherwise provided for in this agreement.
